# Anatomy of a Wedding DVD

Not sure what to expect with your full length wedding video? While every wedding is unique, here's a general idea of what chapters you can expect on your DVD. As always, we never squeeze your video into a set template -- each video is however long it needs to be. In general that can be between 2-3 hours. Your video is a combination of montage sequences set to music (such as guests arriving, photoshoot, and greeting guests) and "real time" sequences (such as the ceremony, grand entrance, and toasts).

## Main Menu

The DVD begins with a Main Menu complete with a looping motion menu. The video keeps playing until you make a selection.

## Chapter Menus

The DVD contains chapter menu pages where you can select which part of the video you want to jump ahead to.
